My training and interests lie at the intersection of social psychology, neuroscience, and positive psychology. My main research area deals with prosociality: empathy, perspective-taking, altruism, loving-kindness, and self-control. In my postdoctoral research, I attempt to reduce political polarization by appealing to shared social identities. I am also passionate about open science, reproducible science, and data science using R (this CV was made in R too).

Academic Service

- Core team member** of *easystats* (seven members; official start date: 2022-08). The *easystats* project aims to increase the adoption of good statistical practices through open science tools, for example through a collection of R packages that provide a unifying and consistent framework around statistics. This responsibility involves writing code to improve the various R packages associated with the project and participating in the general decision-making. At this time, the *easystats* packages have collectively been downloaded over 20 millions times. Available from: <https://easystats.github.io/easystats/>
