My training and interests lie at the intersection of social psychology, neuroscience, and positive psychology. One of my research areas deals with the mind-body connection, for example through exploring alterations in the sense of embodiment, the placebo effect, and mindfulness. A second central research area of mine focuses on prosociality: empathy, perspective-taking, altruism, loving-kindness, and self-control. I am also passionate about open science, reproducible science, and data science using R (this CV was made in R too).

Academic Service

Core team member of *easystats* (seven members; official start date: 2022-08). The *easystats* project aims to increase the adoption of good statistical practices through open science tools, for example through a collection of R packages that provide a unifying and consistent framework around statistics. This responsibility involves writing code to improve the various R packages associated with the project and participating in the general decision-making. At this time, the *easystats* packages have collectively been downloaded over 12 millions times. Available from: <https://easystats.github.io/easystats/>

Reviewer for the *XXI World Congress of Medical and Clinical Hypnosis*, organized by the International Society of Hypnosis and the Société Québécoise d'Hypnose, August 22-25, 2018, Montréal.

Reviewer for scientific journals (total of 11): *Group Processes and Intergroup Relations* (1), *Psychology of Consciousness: Theory, Research, and Practice* (7), *International Journal of Mental Health Promotion* (1), *Scientific Reports* (1), *Journal of Statistical Software* (1).
